Banque Federative du Credit Mutuel

Update to credit analysis

Summary

[Banque Federative du Credit Mutuel's](#) (BFCM) a3 Baseline Credit Assessment (BCA) is driven by our assessment of the standalone creditworthiness of [Credit Mutuel Alliance Federale](#) (CMAF). BFCM acts as the issuing vehicle and holding company for all the operating subsidiaries of the mutualist group CMAF, which is part of [Groupe Credit Mutuel](#) (GCM). The a3 BCA reflects CMAF's very stable financial fundamentals and low-risk profile, which stem from the group's strong retail bancassurance franchise and commercial banking business, predominantly based on a large branch network in France.

BFCM's deposit and senior unsecured debt ratings of Aa3, with a stable outlook, reflect the bank's Adjusted BCA of a3, based on GCM's standalone credit profile; the very low loss given failure under our Advanced Loss Given Failure (LGF) analysis at the level of GCM, which results in two notches of uplift; and an additional one-notch support uplift, reflecting moderate probability of support from the [Government of France](#) (Aa2 stable) because of GCM's systemic importance to the domestic economy.

Exhibit 1

Rating Scorecard - Key financial ratios

Source: Moody's Financial Metrics™

Credit strengths

- » Strong bancassurance network, especially in France, presenting a low-risk profile.
- » Strong capital and retained earnings aid the bank's ability to withstand shocks.
- » The funding structure and comfortable liquidity buffer mitigate significant reliance on wholesale funding.

Credit challenges

- » High prices and interest rates as well as low economic growth will hurt customers' creditworthiness.
- » Residential mortgage loans in France, which is the bank's core business, have low margins

Outlook

The outlook on BFCM's Aa3 long-term deposit and senior unsecured debt ratings is stable, reflecting our view that the bank will be able to maintain its strong financial performance and metrics close to the current levels over a 12-18-month horizon despite the subdued economic conditions in France and Europe.

The stable outlook on BFCM's long-term ratings also reflects the stable outlook on the French sovereign debt rating.

Factors that could lead to an upgrade

Enhancements in BFCM's solvency, through a much higher profitability, could bolster its BCA. However, the bank's Adjusted BCA might not see a similar upgrade as it is also influenced by the creditworthiness of the overall group (GCM). The bank would also require a greater issuance of subordinated debt than currently projected to reduce the loss given failure for deposits and senior unsecured debt.

Moreover, the proximity of BFCM's Aa3 long-term deposit and senior unsecured debt ratings to France's sovereign rating of Aa2 could also constrain the possibility of an upgrade.

Factors that could lead to a downgrade

The ratings of BFCM's long-term deposits, senior unsecured debt and junior senior unsecured debt (also referred to as senior non-preferred) could be downgraded because of a deterioration in the standalone financial strength of GCM, resulting in lower Adjusted BCAs. This could happen in the case of a significant weakening in GCM's underlying profitability, mainly as a result of worsening asset quality or a further significant deterioration in its net interest margin; a significant weakening in the group's capitalisation, for example, following major acquisitions; adverse changes in its liquidity or funding profile; or a significant weakening of the operating environment in France.

A downgrade could also stem from lower subordinated debt, resulting in a higher loss given failure.

A downgrade of France's sovereign rating could also lead to a downgrade of BFCM's deposit and senior unsecured ratings because of their proximity with the sovereign rating.

This publication does not announce a credit rating action. For any credit ratings referenced in this publication, please see the issuer/deal page on <https://ratings.moody's.com> for the most updated credit rating action information and rating history.

Profile

Banque Federative du Credit Mutuel (BFCM) is owned by 14 regional federations (out of the 18 federations that make up the entire Groupe Credit Mutuel) and their affiliated local banks. These 14 regional federations, together with BFCM and [Credit Industriel et Commercial](#) (CIC, Aa3/Aa3 stable, baa1¹), make up Credit Mutuel Alliance Federale (CMAF) (the largest subgroup within the wider GCM), which accounted for around 80% of GCM's consolidated total assets. Two federations remain independent, Maine Anjou and Ocean, while two other federations, namely Bretagne and Sud Ouest, are jointly operating under the umbrella of [Credit Mutuel Arkea](#) (CMA, Aa3/Aa3 stable, baa1).

Being fully integrated within CMAF, both strategically and operationally, BFCM fulfills a key role as CMAF's main issuing vehicle and, hence, an important liquidity provider to the group members. BFCM is also the holding company for the group's specialised subsidiaries, such as Cofidis, Targobank and [Groupe des Assurances du Credit Mutuel](#) (GACM, Baa1(hyb) stable).

In May 2023, CMA reached an agreement with the Confédération Nationale du Crédit Mutuel (CNCM) and all other federations on amended bylaws, which, among other things, will preserve the strategic independence of all federations, which was deemed essential by CMA. As a result, CMA has abandoned its plan of separating from the group, which had involved numerous litigation cases over the last 10 years or so with the Confederation.

Please refer to [Groupe Credit Mutuel: Mutual support guarantee in a fragmented group drives our ratings approach](#), for a more comprehensive analysis of GCM's structure and rating construction.

Detailed credit considerations

Low-risk profile

As reflected in the assigned Asset Risk score of a3, CMAF has a low-risk profile, characterised by its large exposures to the home loan market (around 51% of its loan book as of December 2023), which are predominantly domestic and secured (by physical property or a guarantee).

However, the bank's nonperforming loan ratio of 2.8% as of December 2023 is weaker than the EU average² (1.9% as of December 2023), whereas CMAF's IFRS Stage 2 loan ratio of 6.2% as of December 2023 is much lower than the EU average³ (9.6% as of the same date) mainly because of the high proportion of housing loans.

CMAF's large exposure to residential mortgage loans balances higher credit risks from corporate (37% of outstanding loans as of December 2023) and consumer loans (10% of loans). We expect the bank's cost of risk and problem loans to remain low (below 35 basis points [bps] of customer loans). In 2023, CMAF's cost of risk increased to 24 bps from 17 bps in 2022. The escalation in cost of risk can be attributed predominantly to two key elements: the significant decline in the credit quality of large corporate clients and the impact of a deteriorating macroeconomic environment on all business lines. We forecast slower economic growth in France (GDP growth of 0.7% in 2024 compared with 0.9% in 2023) and higher unemployment (7.5% in 2024 compared with 7.3% in 2023⁴).

Exhibit 3

Loan loss provisions/pre-provision income

The peak of provisioning in 2020 was essentially preventive because of the uncertainty related to the health crisis.

Sources: Moody's Ratings and bank reports

A strong capital base and high profit retention

The Capital score of aa2 assigned to CMAF is driven by its high capital ratio, low leverage and history of retaining (exceeding 90%) most of its profit. This consistent profit retention — permitted by its cooperative structure — has allowed the bank to steadily grow its capital base over time. Hence, capital is one of the main strengths of the bank.

The bank's capitalisation will likely remain high despite some commercial expansion and the introduction of a 15% [societal dividend](#) of net income from 2024 onwards.

CMAF's Common Equity Tier 1 (CET1) capital ratio was 18.5% as of December 2023 versus a supervisory review and evaluation process (SREP) requirement of 8.82% for 2024⁵. Its Tier 1 leverage ratio was 7.1% as of year-end 2023. While all French bancassurers' risk-weighted capital ratios are somewhat boosted by the so-called Danish compromise⁶, CMAF's leverage, measured as Moody's-adjusted tangible common equity (TCE)/total assets⁷ (including insurance assets), was sound at 6.3% as of year-end 2023.

CMAF's capital adequacy is also bolstered by the issuance of cooperative shares, which we view as high-quality capital. Its cooperative shares of €8 billion accounted for 13% of total shareholders' equity as of year-end 2023. The return on these instruments, which qualify as core capital (CET1) under the capital requirements regulation, is capped by law at the average yield of the bonds issued by French private companies plus a maximum of 2% that can be added at the bank's discretion. In addition, cooperative shareholders have historically

reinvested a very high share of dividends into newly issued cooperative shares, further strengthening CMAF's capital base. This ability to retain most of the annual profit provides the bank with additional flexibility to shore up its capital base and makes it easier to absorb unexpected losses or adjust to further capital needs prompted by regulatory changes.

The minimum requirement for own funds and eligible liabilities (MREL) is set at the level of GCM on a consolidated basis. GCM's MREL requirements are currently as follows: 21.92% of risk-weighted assets (RWA; 15.36% of RWA for the subordinated MREL requirement) and 6.53% in terms of leverage ratio exposure (LRE). As of year-end 2022, GCM reported MREL ratios well above these requirements. GCM's subordinated MREL ratio, made up with own funds, eligible subordinated and senior non-preferred liabilities, was 22.84% of RWA and 9.18% of LRE as of year-end 2022.

Low but resilient profitability because of large home loan exposure in France

Our ba1 Profitability score for BFCM reflects its low-risk and low-return credit profile. Moreover, it reflects its bancassurance model, which allows the cross-selling of diversified products to its clients. This will continue to support CMAF's earnings stability and help offset the margin pressure faced by French banks since July 2022 when the European Central Bank (ECB) started to increase interest rates. In 2023, fees and commissions, net insurance revenue and revenue from other activities accounted for a high 50% of the bank's net banking income.

CMAF is predominantly focused on domestic retail banking, small and medium-sized enterprise (SME) banking, and the French insurance sector. Including the network of CIC, a large subsidiary of BFCM, the group's geographical coverage is nationwide, with particularly high market shares, exceeding 30% in the east of France. The concentration in relatively low-risk sectors and the interest rate hedging strategies enable the group to deliver resilient and predictable earnings.

CMAF operates in the European consumer credit market (Targobank in Germany and Cofidis particularly in France, Spain, Portugal and Belgium), bringing geographical and business diversification to a portfolio historically focused on French residential loans. These high-margin activities have improved CMAF's overall profitability.

CMAF is also one of the largest insurers in France through GACM, with 37 million life and non-life insurance contracts as of year-end 2023 (up 3.2% from year-end 2022). Insurance activities will continue to be key to the development of the group, both domestically and in Germany.

Exhibit 4

CMAF has some degree of business diversification

Sources: Moody's Ratings and bank reports

In 2023, CMAF reported return on assets of 0.46%, which was weaker than its 0.51% adjusted ratio for extraordinary items in 2022⁸ and the EU average of 0.68% as of year-end 2023⁹.

CMAF's net interest margin, in line with that of many of its French peers, has not benefited from the successive hikes in the ECB's interest rates. This is mainly because home loans are almost exclusively at fixed rates in France and because of the higher interest rate paid on time deposits. The remuneration of term deposits in France is largely a function of regulated savings rates. More than half of

CMAF's total deposits consisted of time deposits as of December 2023. The net interest margin experienced pressure because of two primary factors: the phenomenon known as "taux d'usure", which led to a delay in the repricing of loans, and a decrease in the demand for credit.

In view of the above-mentioned factors, CMAF's revenue grew by only 2.8% in 2023 compared with 2022, constrained by low retail banking activity (+1.7%) and a slight drop in insurance revenue (1.5%). The main driver of revenue growth was the 15% rise in asset management, and corporate and institutional banking revenue. In 2023, CMAF's operating expenses and cost of risk increased more than its revenue (€563 million and €528 million, respectively, compared with revenue growth of €435 million).

The bank disclosed a cost-to-income ratio of 57% as of year-end 2023, which weakened because of higher operating expenses from the 55% reported as of December 2022. Nevertheless, these metrics rank CMAF higher than its French peers (at 68% as of year-end 2023). In contrast, EU banks on average increased significantly their revenue far beyond their expenses, reaching a 56% efficiency ratio as of year-end 2023 compared with 61% as of December 2022¹⁰.

Retail deposit and comfortable liquidity buffer mitigate moderate reliance on wholesale funding

We assign a baa1 Funding Structure score to CMAF. CMAF's loan-to-deposit ratio¹¹ was 110% as of year-end 2023, versus 107% as of year-end 2021 and 105% in 2019. Significant progress was achieved since 2010 when this ratio was around 144%, mainly through the re-intermediation of off-balance-sheet customers' savings and the adoption of an internal policy that required loan growth to be funded by new deposits.

In 2023, CMAF increased its deposits by 5%. However, similar to its peers, the bank's share of time deposits also increased (by 7%, close to 56% of the outstanding deposit mix) as interest rates increased.

Nonetheless, wholesale funding will remain a significant funding source for the group over a 12-18-month horizon. As of year-end 2023, the total amount of market funding (including covered bonds) was €155 billion, of which 66% was medium- to long-term resources.

CMAF's reliance on market funding, which is confidence-sensitive, is mitigated by the term structure of its debt, which minimises funding gaps (that is, shortfall of funding over assets needs) on all maturity buckets from three months to five years. CMAF had liquidity reserves of €170 billion as of December 2023, which we consider sufficient because they fully covered much more than the wholesale debt maturing within 12 months.

CMAF reported a good liquidity coverage ratio (LCR) of 163% on average in 2023. The average high-quality liquid asset (HQLA) portfolio during the same period was high and amounted to €126 billion, 80% of which were deposits with the central banks (mainly the ECB).

The assigned Liquidity Resources score of baa1 incorporates a negative adjustment for ECB's financing and the share of regulated deposits that are not available for business because they are mandatorily centralised at [Caisse des Depots et Consignations](#) (Aa2/Aa2, stable). We expect CMAF's liquidity to decrease in 2024 as a consequence of the repayment of its targeted longer-term refinancing operations (TLTRO) debt (€11 billion) but remain at a good level.

ESG considerations

Banque Federative du Credit Mutuel's ESG credit impact score is CIS-2

Exhibit 5

ESG credit impact score

CIS-2

ESG considerations do not have a material impact on the current rating.

Banque Federative du Credit Mutuel's **CIS-2** reflects that ESG considerations are not material to the rating.

Exhibit 6

ESG issuer profile scores

ENVIRONMENTAL

E-3

SOCIAL

S-3

GOVERNANCE

G-2

Source: Moody's Ratings

Environmental

BFCM faces moderate environmental risks primarily because of its portfolio exposure to carbon transition risk as a diversified bank. In line with its peers, the bank is exposed to mounting business risks and stakeholder pressure to meet broader carbon transition goals. In response, BFCM is developing its climate risk and portfolio management capabilities, and is actively transitioning its lending portfolios to achieve carbon neutrality targets.

Social

BFCM faces moderate social risks mainly related to customer relations as well as to demographic and societal trends. The bank's developed policies and procedures mitigate conduct risk associated with the distribution of financial products such as regulatory and reputational risks, as well as exposure to litigation. Continued investments in technology and the bank's long track record of handling sensitive customer data, as well as appropriate culture and governance that ensure adherence to regulatory standards, help to manage high cyber and personal data risks. BFCM operates mainly in France, which faces challenges from adverse demographic trends affecting long-term economic growth prospects and impacting the demand for certain banking products. Product diversity as well as an ability to adapt to consumer preferences, regulatory changes and societal trends such as digitization are key to address these risks.

Governance

BFCM faces low governance risks. Its risk management policies and procedures are in line with industry practices and the bank has a proven track record of conservative financial policies and contained risk appetite. BFCM is part of the Credit Mutuel mutualist group (GCM), benefiting from the oversight of the group's central body Confederation Nationale du Credit Mutuel. As a mutualist group, GCM's structure has a multi-layered governance set-up, which entails governance and risk management challenges.

ESG Issuer Profile Scores and Credit Impact Scores for the rated entity/transaction are available on Moodys.com. In order to view the latest scores, please click [here](#) to go to the landing page for the entity/transaction on MDC and view the ESG Scores section.

Support and structural considerations

Affiliate support

We assign an Adjusted BCA of a3 to BFCM. This is based on the fact that BFCM's affiliation to CNCM was officially validated in September 2020. Therefore, BFCM falls under the legal scope of GCM's solidarity mechanisms. Besides, the bank is fully integrated within CMAF, both strategically and operationally. It also plays a critical role in the group's payment systems. Therefore, an adverse scenario affecting BFCM would likely be negative for CMAF's credit strength and, by extension, for GCM. We, therefore, take into account the affiliate-backed support for BFCM from GCM. However, this does not result in any rating uplift because BFCM's BCA is at the same level as our assessment of GCM's standalone creditworthiness.

Loss Given Failure (LGF) analysis

GCM and its operating entities in France are subject to the EU Bank Recovery and Resolution Directive (BRRD), which we consider an operational resolution regime. We assume that resolution, if any, would occur at the level of GCM once the said group has reached the point of non-viability. If financial difficulties occur at the level of BFCM, this would be addressed by GCM through affiliate support. Our LGF analysis is, therefore, based on GCM's consolidated liability structure. We also assume residual TCE of 3% and post-failure losses of 8% of tangible banking assets, a 25% runoff in junior wholesale deposits and a 5% runoff in preferred deposits, and assign a 25% probability to deposits being preferred to senior unsecured debt. The proportion of deposits considered junior is 26%. These are in line with our standard assumptions.

Our Advanced LGF analysis indicates a very low loss given failure for deposits and senior unsecured debt, leading us to assign a two-notch uplift to the Adjusted BCA. This uplift comes from the loss absorption provided by the combination of substantial deposit volume and subordination.

Our Advanced LGF analysis indicates likely moderate loss severity for junior senior creditors in the event of the bank's failure, leading to a rating identical to the bank's Adjusted BCA of a3.

Government support considerations

We expect a moderate probability of support from the French government for both deposits and senior unsecured debt issued by BFCM because of GCM's systemic importance in France. This results in a one-notch government support uplift for BFCM's deposit and senior unsecured ratings to Aa3. Subordinated and other junior securities do not benefit from government support, given their purpose is to absorb losses in a resolution scenario.

Methodology and scorecard

About Moody's Bank Scorecard

Our scorecard is designed to capture, express and explain in summary form our Rating Committee's judgement. When read in conjunction with our research, a fulsome presentation of our judgement is expressed. As a result, the output of our scorecard may materially differ from that suggested by raw data alone (though it has been calibrated to avoid the frequent need for strong divergence). The scorecard output and the individual scores are discussed in rating committees and may be adjusted up or down to reflect conditions specific to each rated entity.

- 3 EBA [Risk Dashboard, Q4 2023](#).
- 4 [G-20 momentum persists in 2024 with disinflation and cooler growth ahead](#), May 2024.
- 5 Including a 4.5% Pillar 1 requirement, a 0.98% CET1 Pillar 2 requirement, a 2.5% capital conservation buffer and a 0.84% countercyclical buffer. The other systemically important institution (O-SII) buffer is set at the GCM level only (0.5%).
- 6 According to the EU's Capital Requirement Directive IV and Capital Requirement Regulation, the exposure of bancassurers' insurance activities is reflected in their RWA with a weight of 250%. This results in a higher solvency ratio than if the capital allocated to insurance activities were to be fully deducted from the bank's capital base.
- 7 The bank's TCE leverage ratio is lower than the regulatory Tier 1 leverage ratio because, in line with the European Commission's Delegated Act of 10 October 2014, French bancassurers only include their investments in their insurance subsidiaries instead of total business-related assets in the denominator of the regulatory leverage ratio. Our TCE leverage ratio is based on the bancassurer's total assets, which results in a lower ratio.
- 8 CMAF's return on assets was 0.51% in 2022, adjusted for extraordinary items related to Targobank. This included a goodwill impairment in Germany of €958 million and €270 million related to the sale of the Spanish entity to [ABANCA Corporacion Bancaria, S.A.](#) (Baa3/Baa3 stable, ba1).

MOODY'S CREDIT RATINGS, ASSESSMENTS, OTHER OPINIONS AND MATERIALS ARE NOT INTENDED FOR USE BY ANY PERSON AS A BENCHMARK AS THAT TERM IS DEFINED FOR REGULATORY PURPOSES AND MUST NOT BE USED IN ANY WAY THAT COULD RESULT IN THEM BEING CONSIDERED A BENCHMARK.

All information contained herein is obtained by MOODY'S from sources believed by it to be accurate and reliable. Because of the possibility of human or mechanical error as well as other factors, however, all information contained herein is provided "AS IS" without warranty of any kind. MOODY'S adopts all necessary measures so that the information it uses in assigning a credit rating is of sufficient quality and from sources MOODY'S considers to be reliable including, when appropriate, independent third-party sources. However, MOODY'S is not an auditor and cannot in every instance independently verify or validate information received in the credit rating process or in preparing its Materials.

To the extent permitted by law, MOODY'S and its directors, officers, employees, agents, representatives, licensors and suppliers disclaim liability to any person or entity for any indirect, special, consequential, or incidental losses or damages whatsoever arising from or in connection with the information contained herein or the use of or inability to use any such information, even if MOODY'S or any of its directors, officers, employees, agents, representatives, licensors or suppliers is advised in advance of the possibility of such losses or damages, including but not limited to: (a) any loss of present or prospective profits or (b) any loss or damage arising where the relevant financial instrument is not the subject of a particular credit rating assigned by MOODY'S.

To the extent permitted by law, MOODY'S and its directors, officers, employees, agents, representatives, licensors and suppliers disclaim liability for any direct or compensatory losses or damages caused to any person or entity, including but not limited to by any negligence (but excluding fraud, willful misconduct or any other type of liability that, for the avoidance of doubt, by law cannot be excluded) on the part of, or any contingency within or beyond the control of, MOODY'S or any of its directors, officers, employees, agents, representatives, licensors or suppliers, arising from or in connection with the information contained herein or the use of or inability to use any such information.

NO WARRANTY, EXPRESS OR IMPLIED, AS TO THE ACCURACY, TIMELINESS, COMPLETENESS, MERCHANTABILITY OR FITNESS FOR ANY PARTICULAR PURPOSE OF ANY CREDIT RATING, ASSESSMENT, OTHER OPINION OR INFORMATION IS GIVEN OR MADE BY MOODY'S IN ANY FORM OR MANNER WHATSOEVER.

Moody's Investors Service, Inc., a wholly-owned credit rating agency subsidiary of Moody's Corporation ("MCO"), hereby discloses that most issuers of debt securities (including corporate and municipal bonds, debentures, notes and commercial paper) and preferred stock rated by Moody's Investors Service, Inc. have, prior to assignment of any credit rating, agreed to pay to Moody's Investors Service, Inc. for credit ratings opinions and services rendered by it. MCO and Moody's Investors Service also maintain policies and procedures to address the independence of Moody's Investors Service credit ratings and credit rating processes. Information regarding certain affiliations that may exist between directors of MCO and rated entities, and between entities who hold credit ratings from Moody's Investors Service, Inc. and have also publicly reported to the SEC an ownership interest in MCO of more than 5%, is posted annually at www.moody's.com under the heading "Investor Relations — Corporate Governance — Charter Documents - Director and Shareholder Affiliation Policy."

Moody's SF Japan K.K., Moody's Local AR Agente de Calificación de Riesgo S.A., Moody's Local BR Agência de Classificação de Risco LTDA, Moody's Local MX S.A. de C.V., I.C.V., Moody's Local PE Clasificadora de Riesgo S.A., and Moody's Local PA Clasificadora de Riesgo S.A. (collectively, the "Moody's Non-NRSRO CRAs") are all indirectly wholly-owned credit rating agency subsidiaries of MCO. None of the Moody's Non-NRSRO CRAs is a Nationally Recognized Statistical Rating Organization.

Additional terms for Australia only: Any publication into Australia of this document is pursuant to the Australian Financial Services License of MOODY'S affiliate, Moody's Investors Service Pty Limited ABN 61 003 399 657 AFSL 336969 and/or Moody's Analytics Australia Pty Ltd ABN 94 105 136 972 AFSL 383569 (as applicable). This document is intended to be provided only to "wholesale clients" within the meaning of section 761G of the Corporations Act 2001. By continuing to access this document from within Australia, you represent to MOODY'S that you are, or are accessing the document as a representative of, a "wholesale client" and that neither you nor the entity you represent will directly or indirectly disseminate this document or its contents to "retail clients" within the meaning of section 761G of the Corporations Act 2001. MOODY'S credit rating is an opinion as to the creditworthiness of a debt obligation of the issuer, not on the equity securities of the issuer or any form of security that is available to retail investors.

Additional terms for India only: Moody's credit ratings, Assessments, other opinions and Materials are not intended to be and shall not be relied upon or used by any users located in India in relation to securities listed or proposed to be listed on Indian stock exchanges.

Additional terms with respect to Second Party Opinions (as defined in Moody's Investors Service Rating Symbols and Definitions): Please note that a Second Party Opinion ("SPO") is not a "credit rating". The issuance of SPOs is not a regulated activity in many jurisdictions, including Singapore. JAPAN: In Japan, development and provision of SPOs fall under the category of "Ancillary Businesses", not "Credit Rating Business", and are not subject to the regulations applicable to "Credit Rating Business" under the Financial Instruments and Exchange Act of Japan and its relevant regulation. PRC: Any SPO: (1) does not constitute a PRC Green Bond Assessment as defined under any relevant PRC laws or regulations; (2) cannot be included in any registration statement, offering circular, prospectus or any other documents submitted to the PRC regulatory authorities or otherwise used to satisfy any PRC regulatory disclosure requirement; and (3) cannot be used within the PRC for any regulatory purpose or for any other purpose which is not permitted under relevant PRC laws or regulations. For the purposes of this disclaimer, "PRC" refers to the mainland of the People's Republic of China, excluding Hong Kong, Macau and Taiwan.
